

JOSEPH MORTIERE, MBA

AI Product Leader | Generative AI & LLM Workflows | Agent Ecosystems | Digital Transformation

Dexter, MI • 734-660-9083 • jmortier@umich.edu • linkedin.com/in/joeymortiere

PROFESSIONAL SUMMARY

AI product leader who sets strategy and ships. Directs a team of product managers and AI builders delivering enterprise AI across client-facing verticals — pairing executive product leadership with rare hands-on building (Claude, Claude Code, Replit), so strategy stays grounded in what the technology can actually do. Turns emerging model capabilities into production agents integrated across Salesforce and enterprise data platforms (with engineering partnership on SSO, security, and scale) and into measurable outcomes, from \$18M+ in reclaimed advisor capacity to enterprise programs delivered at national scale.

PROFESSIONAL EXPERIENCE

AI Product Lead **OneDigital** | Remote

June 2024 – Present

- Lead product strategy and delivery across OneDigital's client-facing verticals — directing a team of 5 product managers and AI builders to meet the product and AI needs of every practice.
- Directly own MyOneDigital, the firm's AI-enabled Salesforce Experience Cloud platform serving 2,000+ enterprise clients, and lead the Wealth practice's AI product roadmap.
- Shipped an AI financial-planning coworker across the Wealth organization that saves advisors 30–45 minutes per client meeting — roughly 8–10 hours per advisor each week — reclaiming an estimated \$18M+ in annual advisor capacity across 225 advisors, validated through advisor surveys and productivity metrics.
- Reinvested that reclaimed capacity into growth — leading an AI growth-intelligence capability that surfaces expansion opportunities from external market signals (money in motion, IPOs, M&A) and household relationship mapping, within and beyond advisors' existing books of business.
- Architect AI products on top of unstructured enterprise data — designing integration across Snowflake, Salesforce, Microsoft Dynamics 365, and financial-planning systems via API endpoints and MCP servers, and partnering with engineering to build production agents (Cassidy AI) that meet SSO, security, and scale requirements.
- Prototype rapidly with Claude, Claude Code, and Replit to validate AI product concepts before committing production investment.
- Scaled AI adoption across the business — enabling a cohort of 40 business-user builders and turning their high-value homegrown products into supported, enterprise-ready platform capabilities.
- Advise executive leadership on AI investment priorities, translating emerging model capabilities into product strategy and prioritization decisions.

Senior Sales Enablement Product Manager **Huntington National Bank** | Remote

June 2022 – June 2024

- Spearheaded enterprise sales enablement and digital transformation — CRM optimization, workflow modernization, and lead-generation strategy — for a 3,000+ user commercial banking organization.
- Delivered \$2M+ in operational cost savings through platform consolidation, workflow optimization, and measurable gains in sales productivity.
- Transformed a consultant-built lead-generation platform into a scalable internal Salesforce product, improving pipeline visibility and execution across the sales organization.
- Redesigned commercial banking workflows in partnership with sales leadership and operations, driving measurable improvements in usability, pipeline visibility, and deal execution.

Digital Sales Product Manager **Thomson Reuters** | Ann Arbor, MI

November 2019 – June 2022

- Led digital commerce strategy for Tax & Accounting — launched self-serve try-and-buy experiences and pricing experiments generating \$500K+ in online transactions.
- Drove conversion optimization through rapid experimentation and analytics, partnering across product, sales, marketing, and CRM to modernize the end-to-end customer acquisition journey.

Advanced Engineering Product Manager **Ford Motor Company** | Dearborn, MI

January 2018 – November 2019

- Led development of connected-vehicle and fleet-management capabilities within Ford Commercial Solutions, delivering 10+ enterprise APIs supporting telematics, remote vehicle functionality, diagnostics, and fleet operations.
- Commercialized connected-vehicle technologies across 10,000+ vehicles, enabling integrations across Ford's commercial fleet ecosystem.

Supply Chain Systems Product Manager

Ford Motor Company

| Dearborn, MI

January 2017 – January 2018

- Led supply-chain modernization workstreams within a global program that delivered ~\$150M in cost savings — owning vehicle tracking, logistics visibility, and operational-efficiency initiatives across multiple teams.
- Managed agile delivery, stakeholder coordination, and enterprise modernization across a complex, multi-team program environment.

SAP Warehouse Management Business Analyst

Ford Motor Company

| Dearborn, MI

March 2015 – December 2016

- Supported enterprise SAP Warehouse Management implementations across Ford's North American parts-distribution network, focused on operational modernization and business-process optimization.
- Drove testing automation and enterprise system deployment, improving operational accuracy and accelerating go-live timelines across distribution facilities.

CORE SKILLS

AI Product Leadership	AI Product Strategy · Model Selection & Evaluation · LLM Workflows & Agent Ecosystems · Leading PM & AI Builder Teams · Roadmaps, OKRs & Executive Alignment
Build & Scale	Rapid Prototyping (Claude, Claude Code, Replit) · Agent Development (Cassidy AI) · Enterprise Integration (Snowflake, Salesforce, Dynamics 365) · API Endpoints & MCP Servers · Unstructured Data Platforms · SSO, Security & Scale Readiness
AI Enablement & Adoption	Training Business Users to Build with AI · Scaling Homegrown Products into Platform Capabilities · Workflow Automation · Digital Transformation · Change Management

EDUCATION

MBA — Wayne State University, Information Systems Management & Global Supply Chain

BBA — University of Michigan–Dearborn, Information Technology Management

Digital Transformation Certification — Cornell University

ADDITIONAL

Adjunct Professor — Management Information Systems

Nova Southeastern University

Current

Instruct graduate and undergraduate students in Management Information Systems — covering enterprise systems, digital transformation, data-driven decision-making, and AI concepts. Focused on preparing students for modern careers at the intersection of business and technology.

Executive Board Member & Co-Founder

Tailgate Connect, LLC

Current

Co-founded Tailgate Connect, a digital marketplace connecting fans with premium tailgate experiences at sports and live events. Rebuilt the platform on an AI-first technology stack — focused on rapid development, automation, scalability, and UX. Guide product strategy, platform growth, and digital operations at the board level.

Co-Chairman, Volunteer Transportation Committee

Rocket Mortgage Classic (PGA TOUR)

Annual

Lead volunteer transportation operations for one of the PGA TOUR's premier events — coordinating logistics and transportation workflows for tournament volunteers and operational staff throughout tournament week.
